Processes Unlimited International Inc. Receives ENR Top 500 Design Firms Award – 3rd Year in a Row

Bakersfield, California- May 1, 2009: Processes Unlimited International Inc. announced today it has received the 2009 “Top 500 Design Firm” award from Engineering News-Record (ENR), ranking 247 out of 500 of the top design firms in the nation. ENR is a weekly magazine dedicated to providing industry news and analysis for construction, design, contract, and engineering professionals. ENR surveys the construction industry to determine the 500 largest engineering, architectural and environmental design firms in the U.S. both publicly and privately held.

ENR selected Processes Unlimited based on revenues for engineering and design services performed in 2008. The company was able to make a dramatic jump in the rankings due to a strong presence in the oil and gas, food and beverage, alternative energy, and international markets. During 2008, Processes Unlimited successfully acquired Dean Oliver International which has expanded the company’s presence geographically and within new market segments. This is the third year in a row in which Processes Unlimited has been named to the list. The company’s previous ENR rankings were 427 in 2008 and 488 in 2007.

Processes Unlimited provides full-service planning, engineering, design, project management, and safety regulatory services. Processes Unlimited has the ability to clearly understand client needs and customize services to meet those needs. The company specializes in the industries of oil and gas, food and beverage, cement, mining, minerals, building products, industrial/manufacturing, and alternative energies. The company currently has offices in Bakersfield, Fresno, Pasadena, and Walnut Creek Calif., Dallas, Tex., Atlanta, Ga., Ft. Collins, Colo. and a joint-venture office located in Chennai India.
